## Write your first Django app

Installed Django already? Good. Now [try this tutorial](#), which walks you through creating a basic poll application. It's got two parts:

1. A public site that lets people view polls and vote in them.
2. An administrative interface that lets you add, change and delete polls.

Admin

One of the most powerful parts of Django is its automatic admin interface. It reads metadata in your models to provide a powerful and production-ready interface that content producers can immediately use to start managing content on your site. It's easy to set up and provides many hooks for customization.
